Description:

Installing Medifile Client
Mac OS 8.6 / 9.x, Windows 2000 / XP

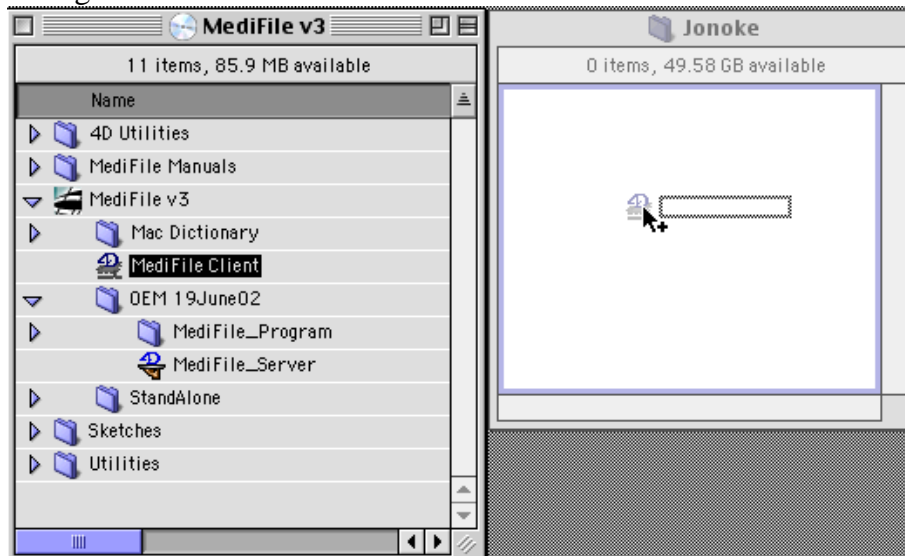

Detail

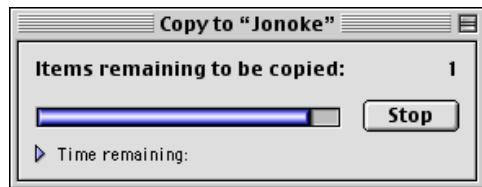

MACINTOSH:

- Double click on the computer HD.
- Create a new folder called "Jonoke".
- Double click on the "Jonoke" folder.
- Open the MediFile v3 CD.

- Double click on the "MediFile v3" folder.
- Click once on the "MediFile Client".
- Drag the file "MediFile Client" to the "Jonoke" window

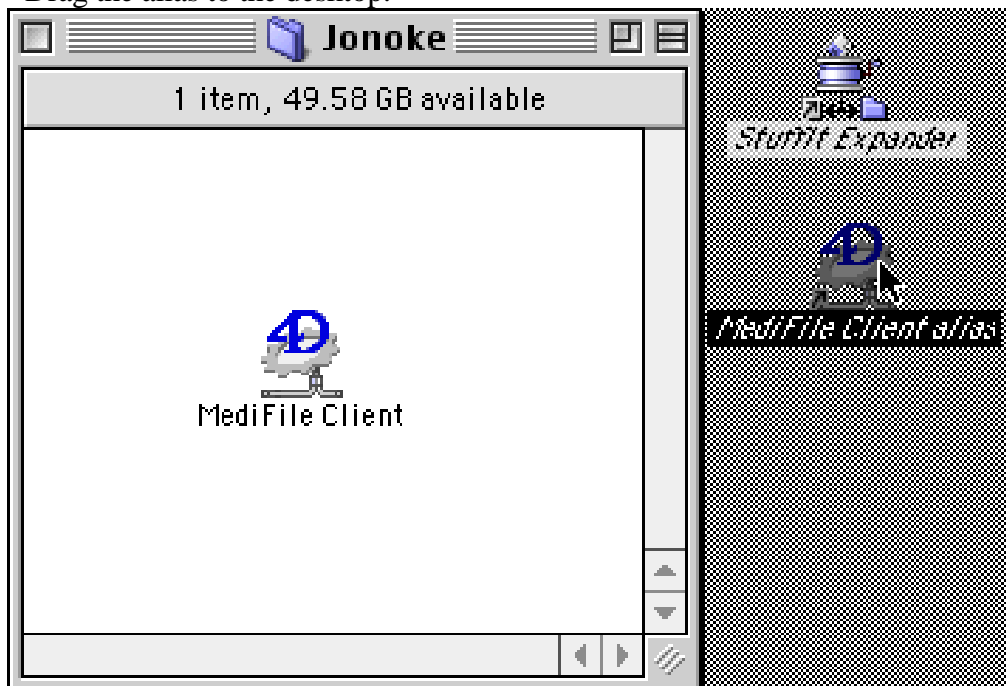

- Close the "MediFile v3" window.
- Click once on the "MediFile Client" file.
- Press command-M, to make an alias.

- Drag the alias to the desktop.

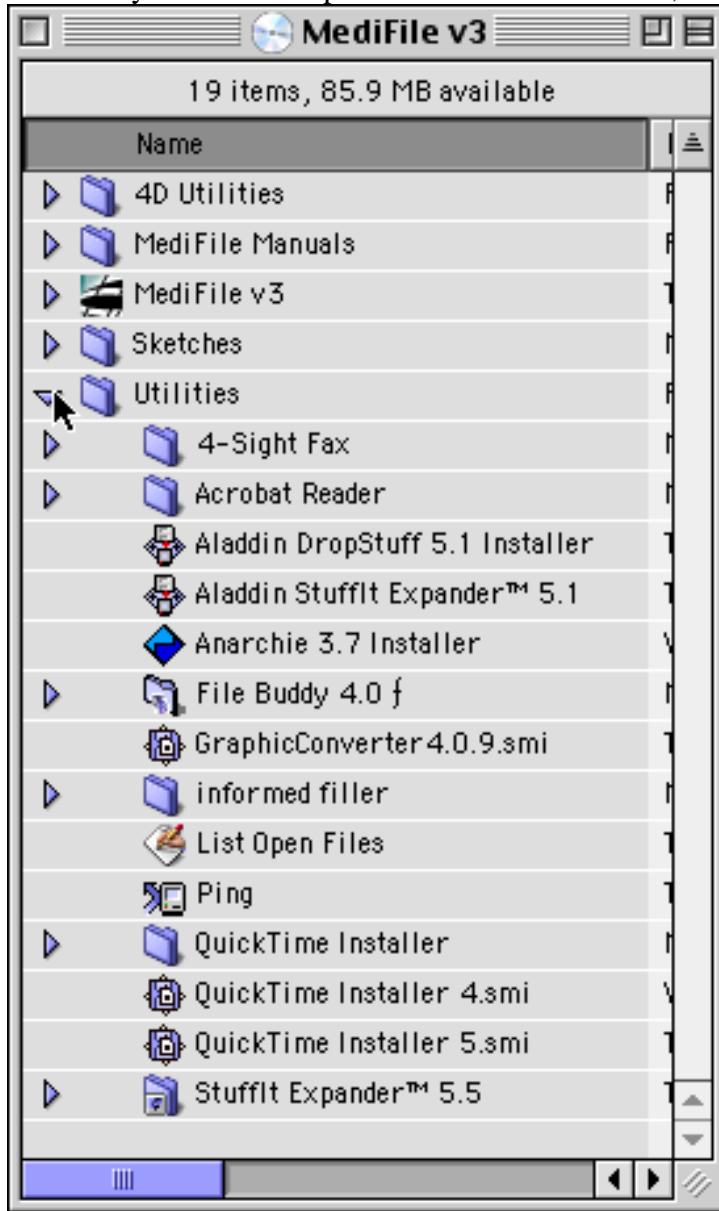

- Open the MediFile v3 CD.
- Double click on the “Utilities” folder. Make sure that the following 3 programs are installed on the computer. Your computer may already have these programs installed. Make sure they are the correct versions:

Acrobat Reader 4.0 or greater.

Quick Time 4.0 or greater.

If your clinic has purchased the Forms Butler, install Informed in the Jonoke directory.

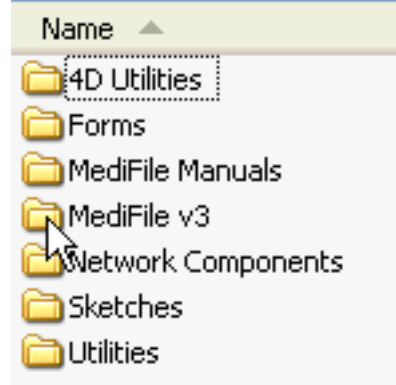

Note: MediFile is now installed on the computer. If you have any problems either contact your clinic administrator or give Jonoke a call.

WINDOWS:

- Open the MediFile v3 CD.

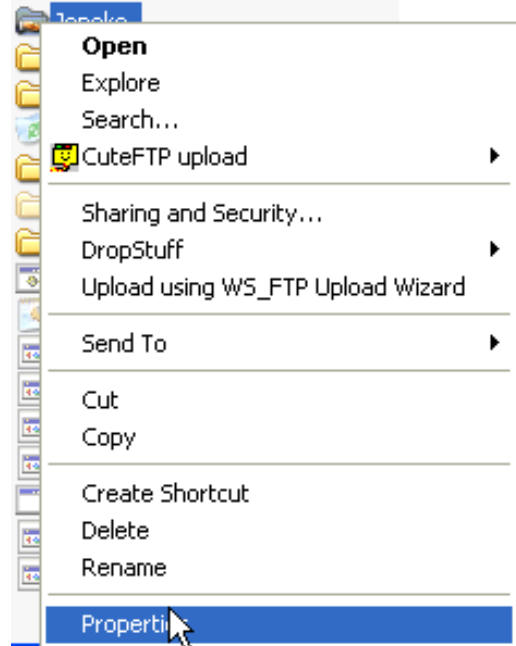

- Double click on the “MediFile v3” folder.

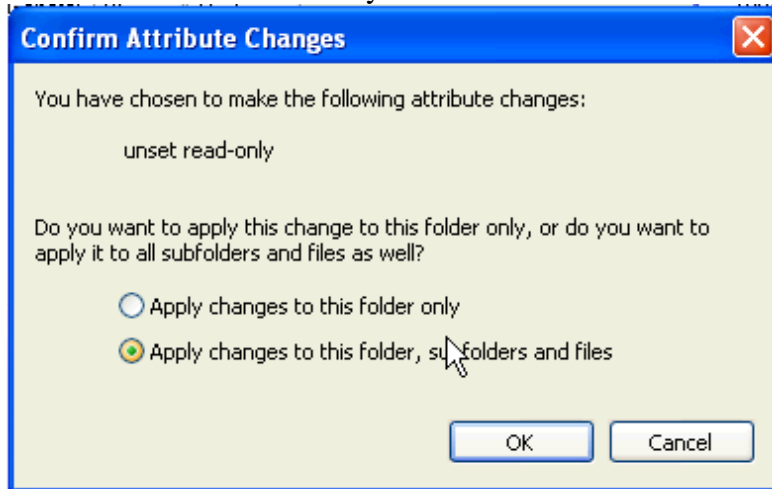

- Click once on the “4D Client 659” folder.
- Press control-C.
- Minimize the “MediFile v3” folder.
- Double click on “My Computer”.
- Double click on the C: drive.
- Press control-V.
- Rename the “4D Client 659” folder to “Jonoke”.

- Right mouse click on the “Jonoke” folder and select Properties.

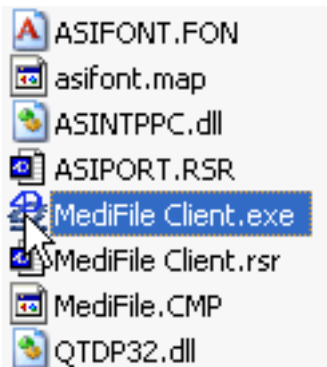

- Make sure that the read only is de-selected for this folder and all it's contents. Click Apply.

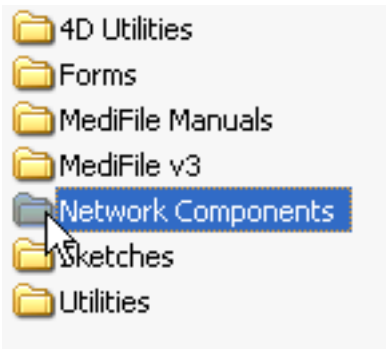

- Double click on the "Jonoke" folder.

- Double click on "MediFile Client.exe" file.

- MediFile will tell you that you need at least one network component install. Click on OK.
- Minimize the "Jonoke" folder.
- Restore the "MediFile v3" folder.
- Press the Backspace key once.
- Click once on the "Network Components" folder.

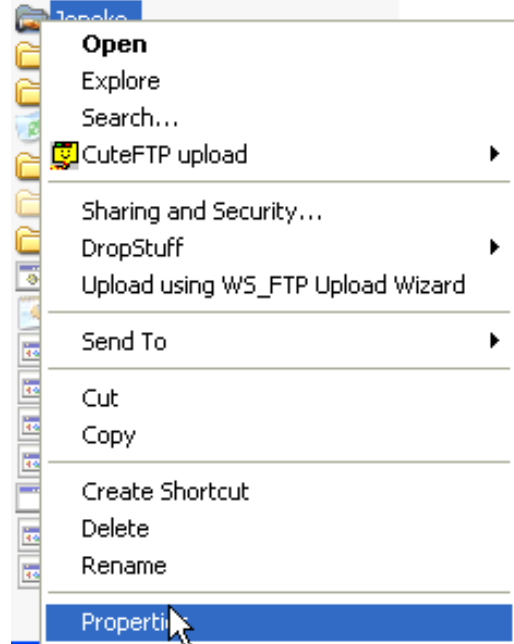

- Press control-C.
- Close this window.
- Restore the "Jonoke" window.
- Press the Backspace key once.
- Search for the folder called "ACT" and go to its location.

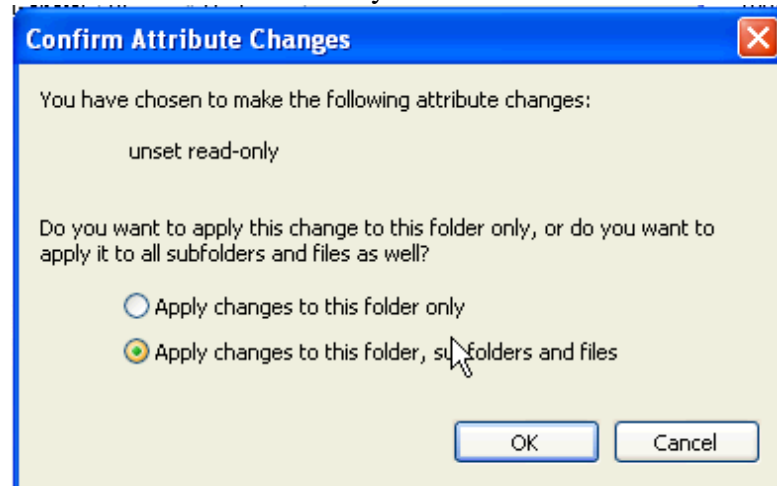

- Double click on the “ACI” folder.
- Press control-V.
- Rename the “Network Components” folder to “Network”.

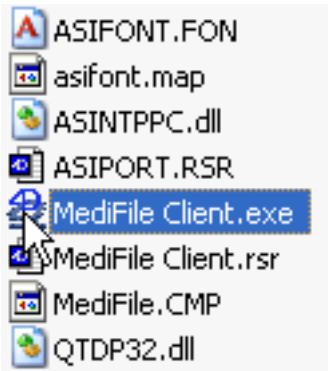

- Right mouse click on the “Network” folder and select Properties.

- Make sure that the read only is de-selected for this folder and all it's contents. Click Apply.

- Close all windows.
- Double click on “My Computer”.
- Double click on the C: drive.
- Double click on the “Jonoke” folder.
- Make a short cut of the file called “MediFile Client.exe” to the desktop.

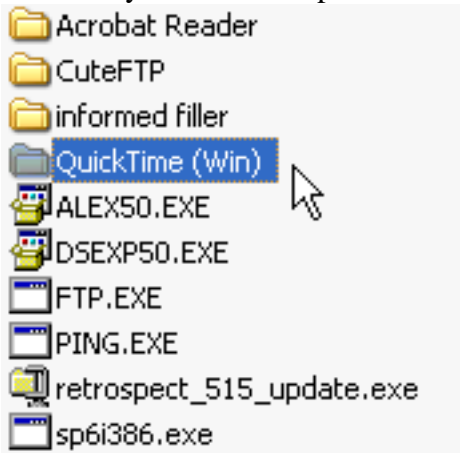

- Close all windows.
- Open the MediFile v3 CD.
- Double click on the “Utilities” folder. Make sure that the following 3 programs are installed on the computer:

Acrobat Reader 4.0 or greater.

Quick Time 4.0 or greater.

If your clinic has purchased the Forms Butler, install Informed in the Jonoke directory.

Note: MediFile is now installed on the computer. If you have any problems either contact your clinic administrator or give Jonoke a call.
