

Gateway to the Paperless Office

SPECIAL OFFER

5%
OFF SOFTWARE
WHEN YOU SWITCH TO
MEDIFILE FROM YOUR
CURRENT PAPERLESS
MEDICAL OFFICE SYSTEM

There are many EMR solutions to choose from, and making the right choice the first time is not always the way your own clinic's transition may have transpired. The cost and effort invested in a system that turns out to be dissatisfying, is a lingering frustration to say the least.

Jonoke would like to ease this disappointment and the financial burden as we are able, as you consider your alternatives. Clinics across Canada have discovered how MediFile fulfills every clinic's unique needs, and with remarkable support, training, and enhancements. Now you can switch to MediFile with a savings of 5% off the software cost of your new MediFile solution.

**Contact Jonoke today

and to schedule a live demonstration of MediFile.**

Go EMR – and do it right the first time.

For a number of our current clients, MediFile "should have been their first choice." There are many options out there for an EMR solution, but clinics keep gravitating to Jonoke's MediFile, even after trying other EMR software. If you have yet to implement an EMR system, or are dissatisfied with your current system, you are sure to find what you need with MediFile.

A unique solution

MediFile is well beyond other EMR solutions – right from the ground up. The decisions made during its development, particularly from a programming standpoint, have consistently focused on promoting its reliability and longevity:

STABILITY – The 4th Dimension (4D) programming language is a proven powerhouse for heavy, extensive data management. As a cross-platform solution, it provides the foundation for MediFile in a way that other EMR software simply lacks.

SECURITY – From outside or within your clinic, MediFile is a veritable fortress, and only the proper authorization will gain someone access to the system.

SCALABILITY – MediFile grows with your practice. The system you first purchase is not necessarily the last setup you will need. Adding workstations or expanding to multiple locations is always possible, and without compromising performance.

This development has also relied heavily on user feedback, resulting in functionality and enhancements based on real-world use. What's more, MediFile will essentially always be in development, as its features are honed and augmented.

A distinct company

Jonoke Software has been developing MediFile since 1988, we take pride in providing a complete, enduring software solution for modern clinics. Jonoke places a high priority on having skilled staff, for the sake of continuing the growth and strengthening of MediFile. We are currently comprised of:

- 14 dedicated medical software staff
- 5 dedicated support staff
- 5 software programmers
- 2 technical writers
- professional graphic designer

The minds working behind the scenes at Jonoke, exclusively for our medical office software, set us apart from other vendors who have limited staff or whose EMR product is not the focus of their business.
